Copies of the report and accounts to 31 March 2021 may be obtained from the registered office of BMO Investments (Lux) I Fund (the "Fund") at 49, Avenue J.F. Kennedy, L-1855 Luxembourg, Grand Duchy of Luxembourg and from foreign representatives and will be posted to shareholders on request. Notices to Shareholders are published in the *Recueil Electronique des Sociétés et Associations* (the "RESA") and in Luxembourg newspapers, to the extent required by Luxembourg law, and in such other newspapers as the Directors may decide. The articles of incorporation of the Fund (the "Articles") have been lodged at the *Registre de Commerce et des Sociétés* of Luxembourg where they are available for inspection and copies can be obtained upon request. The net asset value of each of the Fund's shares is published in accordance with the relevant appendices of the Fund's latest prospectus (the "Prospectus"). The issue and redemption prices are available from BMO Asset Management Limited, Exchange House, Primrose Street, London EC2A 2NY, United Kingdom, at the registered office of the Fund and will be published as further described in the Prospectus.

No subscription can be received on the basis of financial reports. Subscriptions are only valid if made on the basis of the current Prospectus, the latest key investor information documents and the latest annual and the most recent semi-annual report, if published thereafter.

The information contained in this report is historical and should not be taken as a guide to future performance. Statements contained in this report concerning future performance are the opinions of management and there can be no guarantee that such opinions will prove to be correct.

BMO Investments (Lux) I Fund

The Portfolios and their Objectives

BMO Diversified Growth Fund

The investment objective of the Portfolio is to achieve capital appreciation over the medium to long-term through a broadly diversified mix of holdings into traditional and alternative assets including investments in: equities, bonds, indirect property and indirect commodities. The Portfolio intends to target a return of 1mth Euribor (or the equivalent local currency 1mth libor rate per hedged share class) +4% over a rolling 3 year period. Portfolio efficiency is maximised, and costs minimised, by using the most efficient products in the market place, that provide liquid, low-cost exposure to the relevant asset class. A combination of cash, Exchange Traded Funds (ETF), financial derivative instruments, listed certificates issued by investment banks, as well as swap contracts and currency are used to structure the Portfolio.

BMO Euro Bond Fund

The investment objective of the Portfolio is to ensure an adequate return of the invested capital while reducing risk due to an adequate investment diversification. The assets of the Portfolio are mainly invested, directly or through the use of financial derivative instruments, in debt securities having a fixed and variable income listed on a stock exchange or dealt in on another regulated market of an OECD-member state, whilst attempting to reduce the exchange risks. Without changing the specific investment policy of the Portfolio and as market conditions and investment opportunities prevail, the Portfolio may, on an ancillary basis, invest in securities listed on a stock exchange or dealt in on a regulated market of a non OECD-member state. Taking into account the principle of investment risk spreading, the Portfolio will invest, directly or indirectly through the use of financial derivative instruments, in investment grade (at the time of the purchase and as defined by recognised rating agents such as Moody's Services or Standard & Poor's) bonds and money market instruments. The Portfolio may invest in financial derivative instruments to achieve its investment objective. Such instruments may also be used for hedging purposes. These instruments may include, but are not limited to, futures, forwards, options, swaptions, interest rate swaps and inflation swaps.

BMO European Growth & Income Fund

The investment objective of the Portfolio is to achieve long-term capital appreciation and an enhanced level of income by investing in companies listed on one of the European States Stock Exchanges or a regulated market. The Portfolio will invest at least 75% of its total assets in equity securities of companies that are incorporated under the laws of, and have their registered office in, a country in Europe. The Portfolio will invest more than 50% in equity securities in the sense of sec. 2 para. 8 of the German Investment Tax Reform Act ("GITA"). In addition to equity and equity-related securities, the Portfolio may also invest in warrants on equity and equity related securities which qualify as transferable securities.

BMO European Smaller Companies Fund

The investment objective of the Portfolio is to make available to investors participation in a Portfolio consisting of securities of European domiciled companies listed on the various European States Stock Exchanges. The Investment policy is directed towards achieving long-term capital growth through investment in small and medium sized companies. The Portfolio will invest at least 75% of its total assets in equity securities of companies that are incorporated under the laws of, and have their registered office in Europe. For this portion of the portfolio the Portfolio will invest at least two thirds (i.e. 50% of its total assets) in small capitalisation companies with a maximum stock exchange capitalisation of Euro 3 billion or equivalent. If the market capitalisation of a company in which the Portfolio holds an investment comes to exceed Euro 3 billion or equivalent, such a holding will be sold or will be counted within the remaining one third of the total assets. The Portfolio will invest more than 50% in equity securities in the sense of sec. 2 para. 8 of the German Investment Tax Reform Act ("GITA").

BMO Eurozone Equity Fund

The investment objective of the Portfolio is to achieve long-term capital appreciation through investments in transferable securities, with a high-income potential, a solid financial structure and a successful management, whilst considering the investment risk spreading. The Portfolio will invest in a carefully selected range of high quality equities and other equity assets, as well as in convertible securities, which provide direct and/or indirect exposure to the geographical areas of countries situated in the European Monetary Union (E.M.U.). The securities in which the Portfolio invests will either be listed on a stock exchange or dealt in on another regulated market in an E.M.U participating country, or these securities will be issued by issuers whose activities predominantly take place in or whose revenues are derived from an E.M.U. participating country. The Portfolio may hold other types of transferable securities (including non-convertible preferred stocks and public debt securities) of OECD issuers or listed on a stock exchange of an OECD member state, in such proportion as prevailing market conditions shall warrant.

BMO Global Absolute Return Bond Fund

The investment objective of the Portfolio is to deliver a return through a combination of income and capital growth. The Portfolio seeks to deliver an absolute return irrespective of bond market direction. The Portfolio aims to achieve this objective through investing at least two thirds of its total assets in corporate bonds. In addition thereto, the Portfolio will invest in bonds issued by other entities including sovereign and supranational issuers. Investments in contingent convertible bonds will not exceed 10% of the Portfolio's net

BMO Investments (Lux) I Fund

The Portfolios and their Objectives (continued)

assets. Exposure to China through the Hong-Kong and Shanghai Bond Connect will normally not exceed 5% of the Portfolio's net assets. The Portfolio may also invest in other transferable securities, collective investment schemes, money market instruments, deposits, cash and cash equivalent, financial derivative instruments and forward transactions.

BMO Global Convertible Bond Fund

The investment objective of the Portfolio is to achieve high returns by investing its assets through a balanced portfolio consisting of convertible securities. The Portfolio will invest its assets in a balanced portfolio consisting of convertible debt securities and synthetic convertibles which offer the most attractive risk/reward characteristics in terms of upward participation and downward protection. The Portfolio will invest at least two thirds of its total assets in convertible debt securities issued by corporations located in Europe, the United States, Japan and Asia.

BMO Global Smaller Companies Equity Fund

The investment objective of the Portfolio is to make available to investors participation in a Portfolio consisting of listed securities of companies on a worldwide basis. The investment policy is directed towards achieving long-term capital growth through investment in small and medium sized companies. The Portfolio will invest more than 50% in equity securities in the sense of sec. 2 para. 8 of the German Investment Tax Reform Act ("GITA"). The Portfolio will invest primarily in equity and equity-linked securities (excluding convertible bonds and bonds with warrants) issued by small and medium sized companies. Small and medium sized companies will generally be companies with a maximum stock exchange capitalisation of US\$ 10 billion or equivalent at the time of purchase. The Portfolio may hold and continue to invest its assets in companies with a higher capitalisation if the capitalisation of the relevant company subsequently reaches or exceeds US\$ 10 billion or equivalent after acquisition by the Portfolio. The Portfolio may also hold cash, exchange traded funds and fixed interest securities should this be considered to be appropriate at any particular time. In normal market conditions investment in liquid assets and debt instruments of any kind will not exceed 15% of the Portfolio's Net Asset Value.

BMO Global Total Return Bond Fund

The investment objective of the Portfolio is to deliver a return through a combination of income and capital growth. The Portfolio aims to achieve this objective through investing at least two thirds of its total assets in corporate bonds. In addition thereto, the Portfolio will invest in bonds issued by other entities including sovereign and supranational issuers. Investments in contingent convertible bonds will not exceed 10% of the Portfolio's net assets. Exposure to China through the Hong-Kong and Shanghai Bond Connect will normally not exceed 5% of the Portfolio's net assets. The Portfolio may also invest in other transferable securities, collective investment schemes, money market instruments, deposits, cash and cash equivalent, financial derivative instruments and forward transactions.

BMO Plus II Fund

The investment objective of the Portfolio is to achieve an above average rate of return over the long-term, measured in Euro, through investing in shares or units of other collective investment schemes that invest in global developed market equities and bonds or by investing in global developed equity and bond markets directly. Up to 5% of the Portfolio's total assets may be invested in shares or units of other collective investment schemes that invest in emerging market equities.

BMO Responsible Euro Corporate Bond Fund

The investment objective of the Portfolio is to achieve an above average rate of return over the long-term, measured in Euro, through investing mainly in investment grade fixed income debt securities, floating rate and other debt securities, including asset backed securities and contingent convertible bonds, issued by companies. Investment grade securities are defined as securities that are rated Baa3/BBB- or higher by Moody's, Standard & Poor's or another recognised credit rating agency. The Portfolio may also invest up to 15% of its net assets in sub investment grade fixed income debt securities, floating rate and other debt securities. Investments in asset backed securities may not exceed 10% of the Portfolio's net assets. Investments in contingent convertible bonds will not exceed 10% of the Portfolio's net assets.

BMO Responsible Global Emerging Markets Equity Fund

The purpose of the Portfolio is to provide a medium through which investors may participate in an actively managed portfolio, primarily invested in equity and equity-related securities of companies in emerging markets worldwide. The Portfolio may, as described below, invest in companies which are listed or traded on a recognised exchange in emerging market countries worldwide, which have, in the opinion of the Investment Manager, the potential for generating long term returns and contribute to or benefit from the sustainable economic development of the emerging market countries. The subscription proceeds relating to the different Classes of Shares in issue shall be invested in one common underlying portfolio of investments. Each Class of Shares will have a proportional entitlement to the assets (and liabilities) of the Portfolio (calculated according to the prevailing Net Asset Values of each Class). The Portfolio will invest at least two thirds of its total assets in equity and equity-linked securities (excluding convertible bonds and bonds

BMO Investments (Lux) I Fund

The Portfolios and their Objectives (continued)

with warrants), of companies that are incorporated under the laws of, and have their registered office in, an emerging market country, or that derive a predominant part of their economic activity from emerging market countries, even if listed elsewhere. The Portfolio will invest more than 50% in equity securities in the sense of sec. 2 para. 8 of the German Investment Tax Reform Act ("GITA").

BMO Responsible Global Equity Fund

The Portfolio focuses on long-term capital growth through investment in companies across the world. Its objective is to maximise returns through investment in an ethically screened and diverse universe of companies. The Portfolio will invest at least two thirds of its total assets in equity and equity-related securities (excluding convertible bonds and bonds with warrants) of companies, in any market, that meet the ethical and sustainable criteria. The Portfolio will invest a more than 50% in equity securities in the sense of sec. 2 para. 8 of the German Investment Tax Reform Act ("GITA").

BMO SDG Engagement Global Equity Fund

The Portfolio aims to achieve long-term capital growth and support sustainable development. The Portfolio invests primarily in a diversified portfolio of equity and equity-related securities (excluding convertible bonds and bonds with warrants) of small- and mid-capitalisation companies, which may be anywhere in the world and be in any industry or sector. The Portfolio will hold more than 50% in equities securities in the sense of sec. 2 para. 8 of the German Investment Tax Reform Act ("GITA").

BMO Sustainable Multi-Asset Income Fund

The investment objective of the Portfolio is to achieve capital appreciation and income, while maintaining long-term value. The Portfolio will invest in a diversified mix of holdings in traditional and alternative asset classes. The Portfolio will invest a majority of its assets in equity securities and debt securities, including investment grade, below investment grade debt securities and contingent convertible bonds. The Portfolio may invest in derivatives to enhance performance by gaining exposure to a number of alternative sources of return and controlling risk. Derivatives may be traded through recognised exchanges or over-the-counter ("OTC") and may include but are not limited to, options, futures, swaps (including, but not limited to, total return swaps on strategies, equity baskets, equity indices, property or commodity indices), contracts for difference and forward contracts. The Portfolio may invest up to 10% of its net assets in below investment grade debt securities. The Portfolio will not invest in securities that are "distressed" or "defaulted" at the time of their purchase by the Portfolio. In the event of a downgrading of any debt security held by the Portfolio, the Investment Manager will take all reasonable efforts to keep this exposure below 5% of the Portfolio's net assets and to realise the distressed or defaulted securities as soon as reasonably practicable if this is in the best interest of the Shareholders. Investments in contingent convertible bonds will not exceed 5% of the Portfolio's net assets. The Portfolio will invest a minimum of 26% in equity securities in the sense of sec. 2 para. 8 of the German Investment Tax Reform Act ("GITA").

BMO Sustainable Opportunities European Equity Fund

The investment objective of the Portfolio is to achieve long-term capital appreciation by investing in European companies listed on one of the European States Stock Exchanges or a regulated market. The Portfolio will invest at least 75% of its total assets in equity securities of companies that are incorporated under the laws of, and have their registered office in, a country in Europe. The Portfolio will invest more than 50% in equity securities in the sense of sec. 2 para. 8 of the German Investment Tax Reform Act ("GITA").

BMO US Smaller Companies Fund

The investment objective of the Portfolio is to make available to investors participation in a Portfolio consisting of securities of United States companies listed on United States Stock Exchanges or NASDAQ. The investment policy is directed towards achieving long-term capital growth through investment in small and medium sized companies. The Portfolio will invest at least two thirds of its total assets in equity and equity-linked securities (excluding convertible bonds and bonds with warrants) of small capitalisation companies that are incorporated under the laws of, and have their registered office in the United States, or that derive a predominant part of their economic activity from the United States, even if listed elsewhere. The Portfolio will invest more than 50% in equity securities in the sense of sec. 2 para. 8 of the German Investment Tax Reform Act ("GITA"). The Portfolio will invest in companies with a maximum stock exchange capitalisation of US\$ 10 billion or equivalent at the time of purchase. The Portfolio may hold and continue to invest its assets in companies with a higher capitalisation if the capitalisation of the relevant company has reached or exceeded US\$ 10 billion or equivalent after acquisition by the Portfolio.

BMO Diversified Growth Fund

Performance

Over the six months to 31 March 2021, the Class X shares - EUR returned 8.1%. The Class A shares EUR returned 7.3%. By comparison the benchmark of 1-month Euribor, plus 4% per annum, returned 1.7% over the same period. Performance is net of fees and in euro terms.

The strategy generated a positive return over the period. Exposure to equities drove returns for the Portfolio as global equity markets rallied sharply. In contrast, fixed income positioning generally cost performance as yields increased, mostly on the back of inflation concerns and an improving global economy. Alternatives contributed positively with both alternative betas and alternatives strategies delivering positive returns. The macro strategy continued its recent strong run of performance on the back of a travel & leisure position initiated with the expectation of positive news on coronavirus vaccines, a short rate positions and taking long stances in sterling and the rupee. Listed alternatives benefitted in part from the reopening trade, with property sectors such as hotels performing strongly.

Market Review

Global equity markets rose strongly over the six months. Stocks found support from the rollout of Covid-19 vaccines along with accommodative monetary policy and fiscal support measures. President Biden signed a \$1.9tn coronavirus relief package into law and unveiled further plans to increase spending on infrastructure by \$2tn. US business survey data for both manufacturing and services pointed to strong levels of activity. Citing uncertainty around the eurozone's near-term outlook given the impact of coronavirus, the European Central Bank said it would speed up the pace of bond purchases transacted through its €1.9tn emergency programme. Global government bond yields rose over the period against economic recovery hopes as well as higher government borrowing and issuance. Inflation expectations increased given the potential for effective Covid-19 vaccination campaigns to drive a strong economic recovery.

Outlook

Global equities appear well supported by massive ongoing fiscal and monetary stimulus along with the rollout of coronavirus vaccines. We have witnessed some rotation out of quality growth, momentum and 'stay-at-home' stocks in favour of economically-sensitive areas of the market such as energy, transportation, commodities, financials and the more cyclical areas within industrials. We view the recent sharp rise in US Treasury bond yields as an investor-led reaction to prospects for stronger economic activity, while central banks remain highly accommodative. We do not see central banks withdrawing liquidity, a factor that has caused yields to spike and asset markets to fall in the past. We therefore believe that a leadership change in global equities is possible during 2021, but this will not, by itself, derail the current equity bull market. We anticipate a further move for higher and steeper government bond yields over the remainder of 2021. The rollout of coronavirus vaccines combined with a higher inflationary backdrop and supportive fiscal policy means further normalisation should be priced into government bond yields. While we retain a constructive view on the outlook for credit markets, we are more cautious in our approach as valuations are beginning to look stretched and corporate leverage, especially in the US, shows little sign of decreasing. Although we do see pockets of wider spreads, continuing global central bank intervention makes it difficult to envisage a significant sell-off in credit assets. Generally, we prefer to be neutral to shorter duration in our positioning.

Multi-Asset Team

May 2021

BMO Euro Bond Fund

Performance

Over the six months to 31 March 2021, the I Acc EUR share class returned -0.9%. By comparison, the BBI Euro Aggregate Treasury Total Return Index returned -1.1%. Performance is total return and in euro terms.

Over the six-month period, the Portfolio outperformed its benchmark. Performance benefited from bearish interest rate positions that had been designed to take advantage of an expected rise in yields as the market looked to an easing of Covid-19 restrictions and stronger economic growth. These positions comprised short duration and yield curve steepening positions in Europe and the United States of America (US). Other positive contributors to performance included cross market strategies, comprising short positions in the US Treasury market versus long positions in Europe and Australia. We had anticipated that the rise in US rates would take place at a faster pace than that of Germany or Australia. This reflected the relative success of the vaccination rollout programme in the US, which has pointed to an earlier re-opening of the US economy.

Market Review

Eurozone government bond yields were on the increase as markets priced in an acceleration in global economic growth for 2021, with rising global interest rate and inflation expectations. As the period progressed, eurozone business survey data pointed to substantial improvement in manufacturing but continued contraction in the service sector. While the rollout of vaccines globally improved prospects for eurozone exporters, the region's consumer demand remained hampered by elevated Covid-19 cases and a stuttering EU vaccination campaign. The European Union (EU) agreed to a €1.8tn EU-wide Covid-19 recovery fund, with the European Commission to raise €750bn in debt markets. The European Central Bank (ECB) raised quantitative easing by €500bn and extended emergency measures to help eurozone banks as it cut eurozone growth forecasts. In March, citing uncertainty around the eurozone's near-term outlook given the impact of Covid-19, the ECB said it would accelerate the pace of bond purchases transacted through its €1.9tn emergency programme. Early official estimates forecast eurozone inflation rising to 1.3% in March versus 0.9% for February, driven by higher energy prices. A no-deal Brexit was averted, with the EU and United Kingdom (UK) agreeing to tariff-free and quota-free trade in goods. German 10-year bund yields moved from around -0.5% to -0.3%.

Outlook

We anticipate European government bond yields to move higher and steeper over 2021. The global rollout of Covid-19 vaccines combined with a higher inflationary backdrop and supportive fiscal policy means further normalisation should be priced into government bond yields. Nevertheless, the vaccine rollout in Europe has lagged that of the US and UK, with the likelihood that eurozone growth will take an additional quarter to return. Although the ECB has increased the pace of quantitative easing, a deluge of government bond issuance during the first quarter means that the second quarter should see much more favourable supply/demand characteristics for eurozone government bonds. The surprise installation of former ECB President Draghi as Italian Prime Minister combined with ECB bond buying is constructive for peripheral eurozone debt.

Performance

In the six months to 31 March 2021, the Class A EUR shares returned 16.5%. By comparison the FTSE All-World Developed Europe NR Index return was 20.1%. All figures are net of fees and in euro terms.

The Portfolio delivered strong absolute returns in the half year, but ended the period behind the benchmark, as positive vaccine news meant the market continued to move ahead, but under very different leadership. Given the nature of the rally, led as it was by more cyclical and lower quality businesses, it is perhaps not surprising that most of the underperformance came from a negative asset allocation, namely due to the portfolio's underweight to the banks and energy sectors. In terms of stock selection, the largest contribution was from Storebrand, the Norwegian financial services group, which reported strong results driven by lower costs and a positive surprise on the insurance business. ASML, the chip maker, outperformed on the back of strong results supported by positive news flow in the sector around tight supply. DNB delivered solid fourth-quarter results and outperformed on the back of the shift in the interest rate outlook. The biggest negative contributions came from some of 2020's winners, including Ubisoft Entertainment and Just Eat Takeaway.com, which had been beneficiaries of spending patterns during lockdowns. The largest individual detractor was SAP, following its announcement that the transition to the cloud would be more protracted and expensive than previously thought.

Market Review

European equity markets recovered strongly over the six months. The eurozone economy shrank by 0.7% in the fourth quarter following the 12.5% expansion in the third quarter. PMI business survey data showed activity in the eurozone manufacturing sector had expanded significantly in February and March as export orders picked up. However, quarantine measures, elevated case levels and concerns over new Covid-19 variants held back the eurozone economy. The eurozone's vaccination campaign was hindered by production shortfalls and safety concerns. PMI data showed a continued contraction in eurozone services activity throughout the quarter. The European Union (EU) agreed to a €1.8tn EU-wide Covid-19 recovery fund, with the European Commission to raise €750bn in debt markets. In December, the European Central Bank (ECB) expanded its quantitative easing programme by €500bn and extended emergency measures to help eurozone banks. In March, the ECB said it would accelerate the pace of bond purchases under its emergency pandemic support programme. A no-deal Brexit was averted, with the EU and United Kingdom agreeing to tariff-free and quota-free trade in goods.

Outlook

While challenges remain, we expect the EU's vaccine rollout to progress, and for European economies to gradually reopen, thereby providing support for some of the most leveraged and currently challenged businesses. The combination of the vaccine rollout together with continued fiscal stimulus and accommodative monetary policy is supportive for European equities and bodes well for European economic prospects in the second half of 2021. Our focus will remain on identifying high-quality companies with wide economic moats and strong balance sheets that can benefit from a brightening outlook but retain the ability to weather any environment. We are keenly focused on picking companies that will thrive in the long term by aligning themselves with sustainability megatrends. Companies with these characteristics tend to be more resilient through business cycles and should prove to be structural winners over the longer term.

BMO European Smaller Companies Fund

Performance

Over the six months to 31 March 2021, the Class A EUR shares returned 22.8%. By comparison the EMIX Smaller European Companies Index (NR), returned 29.6%. Performance is net of fees and in euro terms.

The Portfolio lagged the very strong rise of the market over the period, though its performance remained in the top half of its peer group. Certain holdings of a defensive nature underperformed amid the strong market environment and a rotation towards value/cyclical stocks, such as Gerresheimer, the drug delivery system manufacturer, and Karnov Group, the legal & business information publisher. There was also rotation away from some businesses which had prospered during lockdowns, such as Just Eat Takeaway.com. Avon Rubber was hit by the re-tendering of a key contract with the US Army. Fjordkraft was hit by unfavourable moves in Norwegian spot electricity markets. On the positive side, ASM International, leading supplier of semiconductor process equipment for wafer processing, outperformed on the back of strong results and it and Nordic Semiconductor were supported by positive news flow in the sector around tight supply. The online-broker, flatexDEGIRO, has outperformed on strong business flows, while life insurer Storebrand, saw its solvency position bolstered by higher bond yields. Wizz Air Holdings contributed on the back of anticipated re-opening of markets later in the year.

Market Review

European equity markets delivered good returns over the six months, with smaller companies strongly outperforming the wider market. The eurozone economy shrank by 0.7% in the fourth quarter following the 12.5% expansion in the third quarter. PMI business survey data showed activity in the eurozone manufacturing sector had expanded significantly in February and March as export orders picked up. However, quarantine measures, elevated case levels and concerns over new Covid-19 variants held back the eurozone economy. The eurozone's vaccination campaign was hindered by production shortfalls and safety concerns. PMI data showed a continued contraction in eurozone services activity throughout the quarter. The European Union (EU) agreed to a €1.8tn EU-wide Covid-19 recovery fund, with the European Commission to raise €750bn in debt markets. In December, the European Central Bank (ECB) expanded its quantitative easing programme by €500bn and extended emergency measures to help eurozone banks. In March, the ECB said it would accelerate the pace of bond purchases under its emergency pandemic support programme. A no-deal Brexit was averted, with the EU and United Kingdom agreeing to tariff-free and quota-free trade in goods.

Outlook

While challenges remain, we expect the EU's vaccine rollout to progress, and for European economies to gradually reopen, thereby providing support for some of the most leveraged and currently challenged businesses. The combination of the vaccine rollout together with continued fiscal stimulus and accommodative monetary policy is supportive for European equities and bodes well for European economic prospects in the second half of 2021. Our focus will remain on identifying high-quality companies with wide economic moats and strong balance sheets that can benefit from a brightening outlook but retain the ability to weather any environment. We are keenly focused on picking companies that will thrive in the long term by aligning themselves with sustainability megatrends. Companies with these characteristics tend to be more resilient through business cycles and should prove to be structural winners over the longer term.

BMO Investments (Lux) I Fund

BMO Eurozone Equity Fund

Performance

In the six months to 31 March 2021, the I Acc EUR share class returned 13.8%. By comparison, the Euro Stoxx NR Index, returned 22.6%. Performance is total return and in euro terms.

The Portfolio delivered strong absolute returns in the half year, but ended the period behind the benchmark, as positive vaccine news meant the market continued to move ahead, but under very different leadership. Given the nature of the rally, led as it was by more cyclical and lower quality businesses, it is perhaps not surprising that asset allocation was negative, as the portfolio suffered from limited exposure to the oil and banks sectors. The biggest negative contributions came from some of 2020's winners, and so the majority of the underperformance was driven by stock selection. This include Ubisoft Entertainment and Just Eat Takeaway.com, which had been beneficiaries of spending patterns during lockdowns. The largest individual detractor was SAP, following its announcement that the transition to the cloud would be more protracted and expensive than previously thought. The largest contribution was ASML, the chip maker, on the back of strong results supported by positive news flow in the sector around tight supply. There were strong contributions from among the banks in the Portfolio, with Aareal Bank set to resume dividend payments, while Intesa Sanpaolo reported strong revenues for the fourth quarter.

Market Review

European equity markets recovered strongly over the six months. The eurozone economy shrank by 0.7% in the fourth quarter following the 12.5% expansion in the third quarter. PMI business survey data showed activity in the eurozone manufacturing sector had expanded significantly in February and March as export orders picked up. However, quarantine measures, elevated case levels and concerns over new Covid-19 variants held back the eurozone economy. The eurozone's vaccination campaign was hindered by production shortfalls and safety concerns. PMI data showed a continued contraction in eurozone services activity throughout the quarter. The European Union (EU) agreed to a €1.8tn EU-wide Covid-19 recovery fund, with the European Commission to raise €750bn in debt markets. In December, the ECB expanded its quantitative easing programme by €500bn and extended emergency measures to help eurozone banks. In March, the ECB said it would accelerate the pace of bond purchases under its emergency pandemic support programme. A no-deal Brexit was averted, with the EU and United Kingdom agreeing to tariff-free and quota-free trade in goods.

Outlook

While challenges remain, we expect the EU's vaccine rollout to progress, and for European economies to gradually reopen, thereby providing support for some of the most leveraged and currently challenged businesses. The combination of the vaccine rollout together with continued fiscal stimulus and accommodative monetary policy is supportive for European equities and bodes well for European economic prospects in the second half of 2021. Our focus will remain on identifying high-quality companies with wide economic moats and strong balance sheets that can benefit from a brightening outlook but retain the ability to weather any environment. We are keenly focused on picking companies that will thrive in the long term by aligning themselves with sustainability megatrends. Companies with these characteristics tend to be more resilient through business cycles and should prove to be structural winners over the longer term.

BMO Investments (Lux) I Fund

BMO Global Absolute Return Bond Fund

Performance

Over the six months to 31 March 2021, the Class F GBP Hedged shares returned 2.6%. By comparison, the 3-month Libor return was 0.0%. Performance is total return, net of fees and in sterling terms.

The Portfolio generated a positive absolute return over the period despite negative returns from government bond markets. Positive performance came from credit exposure and the structural tilt to shorter dated bonds. Relative value strategies made a significant, positive contribution, primarily through outright short interest rate duration stances and cross-market positions reflecting the relative pace of economic recovery. Absolute returns were held back by the rise in bond yields.

Market Review

Global government bond yields rose substantially over the period. The US 10-year Treasury bond yields doubled to 1.7%, trading at its highest level since January 2020, with investors positioning themselves for accelerating US economic growth. President Biden signed a \$1.9tn coronavirus relief package into law and unveiled further plans to increase spending on infrastructure by \$2tn. US business survey data for both manufacturing and services pointed to strong levels of activity. Although reported core US inflation remained subdued, both 5-year and 10-year US inflation expectations rose over the quarter. Eurozone government bonds likewise generated negative returns over the period, despite eurozone economic data being more mixed with continued weakness in the eurozone service sector. Citing uncertainty around the eurozone's near-term outlook given the impact of coronavirus, the European Central Bank (ECB) said it would speed up the pace of bond purchases transacted through its €1.9tn emergency programme. Credit yield spreads narrowed, reflecting the positive economic outlook, though corporate bonds also saw a negative duration impact from rising long-term rates.

Outlook

We anticipate a further move for higher and steeper government bond yields over the remainder of 2021. The rollout of coronavirus vaccines combined with a higher inflationary backdrop and supportive fiscal policy means further normalisation should be priced into government bond yields. Central banks should continue to pursue accommodative monetary policy, and we expect the ECB to follow the US Federal Reserve's lead in a shift towards an average inflation targeting framework. The Democrats taking control of Congress has led to the passing of a further \$1.9tn coronavirus fiscal stimulus package to support individuals and businesses. Although the ECB has increased the pace of quantitative easing, a deluge of government bond issuance during the first quarter means that the second quarter should see much more favourable supply and demand characteristics for eurozone government bonds. While we retain a constructive view on the outlook for credit markets, we are more cautious in our approach as valuations are beginning to look stretched and corporate leverage, especially in the US, shows little sign of decreasing. Although we do see pockets of wider spreads, continuing global central bank intervention makes it difficult to envisage a significant sell-off in credit assets. Generally, we prefer to be neutral to shorter duration in our positioning. We continue to focus on areas where carry and roll down is most attractive and remain focused on identifying opportunities to participate in new issues with compelling valuations. We believe corporate bonds continue to be an attractive asset class for investors in search of income.

BMO Investments (Lux) I Fund

BMO Global Convertible Bond Fund

Performance

In the six months to 31 March 2021, the return on the Class A EUR shares was 9.2%, while the return for the Thomson Reuters Global Focus Customised TR Index was 8.0%. The A EUR Hedged share class returned 9.2% and the Class I EUR Hedged shares returned 9.4%. Performance is net of fees and in euro terms.

Convertibles continued to be driven higher with strengthening equity markets. Notably within semiconductors and IT, convertibles nearly doubled from issue price. Our strategy continued to be focussed on selling down deep-in-the-money convertibles and gearing back to more balanced alternatives. Reinvestments continued to be geared towards companies that are expected to benefit from re-opening of the economies. We largely refrained from investing in the surge of US issuance, given demanding valuations. The Portfolio ended the quarter at an equity sensitivity of 0.55 and sub-investment grade exposure of 39.9%, which compares to 41.1% in the benchmark. Equity markets saw a rotation away from technology stocks into more cyclical sectors. During the past year, new convertible issuance has been geared towards IT (notably software), and although a large part has been deleted from index already following strong run-ups, returns of the asset class were still hit by rotation, as well as heavy new issuance. Relative outperformance was broad based against index

Market Review

Convertible bonds generated positive returns over the period. Stocks found support from the rollout of Covid-19 vaccines along with accommodative monetary policy and fiscal support measures. President Biden signed a \$1.9tn coronavirus relief package into law and unveiled further plans to increase spending on infrastructure by \$2tn. US business survey data for both manufacturing and services pointed to strong levels of activity. Citing uncertainty around the eurozone's near-term outlook given the impact of coronavirus, the European Central Bank said it would speed up the pace of bond purchases transacted through its €1.9tn emergency programme. Global government bond yields rose over the period against economic recovery hopes as well as higher government borrowing and issuance. Inflation expectations increased given the potential for effective Covid-19 vaccination campaigns to drive a strong economic recovery.

Outlook

We view convertible bonds as continuing to provide favourable risk/reward conditions. The rollout of coronavirus vaccines has provided reason for optimism, with a likely significant surge in global economic growth during the second half of 2021 as lockdowns are removed or avoided. Along with substantial fiscal and monetary stimulus, the global economic growth outlook is supported by high savings rates and pent-up consumer demand. We expect bond yields to creep up further over the coming months, though with the absolute level of yields remaining subdued. Equities should remain supported by recovering earnings and the still low, absolute level of bond yields. We view convertibles as well placed to benefit from further economic recovery and gains from equities. Compared to credit, interest rate sensitivity is relatively low from prevailing benign yields.

Anja Eijking

Portfolio Manager
May 2021

BMO Global Smaller Companies Equity Fund

Performance

Over the six months to 31 March 2021, the Class I USD shares returned 29.6%. By comparison, the MSCI World Small Cap NR Index, returned 35.5%. Performance is net of fees and in US dollar terms.

The Portfolio lagged the very strong rise of the market. Certain holdings of a defensive nature underperformed amid the strong market environment and a rotation towards value/cyclical stocks, including clinical researcher ICON and flavours and fragrances maker Symrise. Our holding in streaming company Wheaton Precious Metals and SSR Mining underperformed as sentiment on the outlook for precious metals sagged. Non-performing loans specialist PRA Group registered slowing portfolio purchases as consumers accessed temporary government assistance. Positive individual contributors included life insurer Storebrand, with its solvency position bolstered by higher bond yields. Meanwhile, US apparel maker Boot Barn rallied on strong earnings and guidance. Software firm Cerence was boosted by stronger-than-expected results and an improving outlook for the auto sector.

Market Review

Global equity markets rose strongly over the six months, with smaller companies outperforming the wider market. Stocks found support from the rollout of Covid-19 vaccines along with accommodative monetary policy and fiscal support measures. President Biden signed a \$1.9tn coronavirus relief package into law and unveiled further plans to increase spending on infrastructure by \$2tn. US business survey data for both manufacturing and services pointed to strong levels of activity. Citing uncertainty around the eurozone's near-term outlook given the impact of coronavirus, the European Central Bank said it would speed up the pace of bond purchases transacted through its €1.9tn emergency programme. Global government bond yields rose over the period against economic recovery hopes as well as higher government borrowing and issuance. Inflation expectations increased given the potential for effective Covid-19 vaccination campaigns to drive a strong economic recovery.

Outlook

Global equities appear well supported by massive ongoing fiscal and monetary stimulus along with the rollout of coronavirus vaccines. We have witnessed some rotation out of quality growth, momentum and 'stay-at-home' stocks in favour of economically-sensitive areas of the market such as energy, transportation, commodities, financials and the more cyclical areas within industrials. We view the recent sharp rise in US Treasury bond yields as an investor-led reaction to prospects for stronger economic activity, while central banks remain highly accommodative. We do not see central banks withdrawing liquidity, a factor that has caused yields to spike and asset markets to fall in the past. We therefore believe that a leadership change in global equities is possible during 2021, but this will not, by itself, derail the current equity bull market.

BMO Investments (Lux) I Fund

BMO Global Total Return Bond Fund

Performance

Over the six months to 31 March 2021, the Class I Acc EUR shares returned 3.2%. By comparison, its market reference, the Bloomberg Barclays Global Aggregate TR EUR Hedged Index returned -2.1%. Performance is total return, net of fees and in euro terms

The Portfolio generated a positive absolute return over the period despite negative returns from government bond markets. Positive performance came from credit exposure and the structural tilt to shorter dated bonds. Relative value strategies made a significant, positive contribution, primarily through outright short interest rate duration stances and cross-market positions reflecting the relative pace of economic recovery. Absolute returns were held back by the rise in bond yields.

Market Review

Global government bond yields rose substantially over the period. The US 10-year Treasury bond yields doubled to 1.7%, trading at its highest level since January 2020, with investors positioning themselves for accelerating US economic growth. President Biden signed a \$1.9tn coronavirus relief package into law and unveiled further plans to increase spending on infrastructure by \$2tn. US business survey data for both manufacturing and services pointed to strong levels of activity. Although reported core US inflation remained subdued, both 5-year and 10-year US inflation expectations rose over the quarter. Eurozone government bonds likewise generated negative returns over the period, despite eurozone economic data being more mixed with continued weakness in the eurozone service sector. Citing uncertainty around the eurozone's near-term outlook given the impact of coronavirus, the European Central Bank (ECB) said it would speed up the pace of bond purchases transacted through its €1.9tn emergency programme. Credit yield spreads narrowed, reflecting the positive economic outlook, though corporate bonds also saw a negative duration impact from rising long-term rates.

Outlook

We anticipate a further move for higher and steeper government bond yields over the remainder of 2021. The rollout of coronavirus vaccines combined with a higher inflationary backdrop and supportive fiscal policy means further normalisation should be priced into government bond yields. Central banks should continue to pursue accommodative monetary policy, and we expect the ECB to follow the US Federal Reserve's lead in a shift towards an average inflation targeting framework. The Democrats taking control of Congress has led to the passing of a further \$1.9tn coronavirus fiscal stimulus package to support individuals and businesses. Although the ECB has increased the pace of quantitative easing, a deluge of government bond issuance during the first quarter means that the second quarter should see much more favourable supply and demand characteristics for eurozone government bonds. While we retain a constructive view on the outlook for credit markets, we are more cautious in our approach as valuations are beginning to look stretched and corporate leverage, especially in the US, shows little sign of decreasing. Although we do see pockets of wider spreads, continuing global central bank intervention makes it difficult to envisage a significant sell-off in credit assets. Generally, we prefer to be neutral to shorter duration in our positioning. We continue to focus on areas where carry and roll down is most attractive and remain focused on identifying opportunities to participate in new issues with compelling valuations. We believe corporate bonds continue to be an attractive asset class for investors in search of income.

BMO Plus II Fund

Performance

Over the six months to 31 March 2021, the Portfolio returned 18.8% (net of fees, in euro terms).

The Portfolio continues to be fully invested in equities and holds just a marginal cash position. Geographically, Eurozone and US equities continued to be the preferred exposure, accounting for more than 80% of the Portfolio. Over the period the Portfolio benefited from the strong return of the equity market as central banks continued to support financial markets and governments pushed for more fiscal help to revive economic growth. Being fully invested the Portfolio was able to capture the rise of global equities, while the geographic allocation also enhanced performance as Eurozone outperformed most equity markets over this period.

Market Review

Global equity markets rose strongly over the six months. Stocks found support from the rollout of Covid-19 vaccines along with accommodative monetary policy and fiscal support measures. President Biden signed a \$1.9tn coronavirus relief package into law and unveiled further plans to increase spending on infrastructure by \$2tn. US business survey data for both manufacturing and services pointed to strong levels of activity. Citing uncertainty around the eurozone's near-term outlook given the impact of coronavirus, the European Central Bank said it would speed up the pace of bond purchases transacted through its €1.9tn emergency programme. Global government bond yields rose over the period against economic recovery hopes as well as higher government borrowing and issuance. Inflation expectations increased given the potential for effective Covid-19 vaccination campaigns to drive a strong economic recovery.

Outlook

Global equities appear well supported by massive ongoing fiscal and monetary stimulus along with the rollout of coronavirus vaccines. We have witnessed some rotation out of quality growth, momentum and 'stay-at-home' stocks in favour of economically-sensitive areas of the market such as energy, transportation, commodities, financials and the more cyclical areas within industrials. We view the recent sharp rise in US Treasury bond yields as an investor-led reaction to prospects for stronger economic activity, while central banks remain highly accommodative. We do not see central banks withdrawing liquidity, a factor that has caused yields to spike and asset markets to fall in the past. We therefore believe that a leadership change in global equities is possible during 2021, but this will not, by itself, derail the current equity bull market. We anticipate a further move for higher and steeper government bond yields over the remainder of 2021. The rollout of coronavirus vaccines combined with a higher inflationary backdrop and supportive fiscal policy means further normalisation should be priced into government bond yields. While we retain a constructive view on the outlook for credit markets, we are more cautious in our approach as valuations are beginning to look stretched and corporate leverage, especially in the United States of America, shows little sign of decreasing. Although we do see pockets of wider spreads, continuing global central bank intervention makes it difficult to envisage a significant sell-off in credit assets. Generally, we prefer to be neutral to shorter duration in our positioning.

BMO Responsible Euro Corporate Bond Fund

Performance

Over the six months to 31 March 2021, the Class F Inc EUR shares returned 0.9%. This compares to the BBI Euro Aggregate Corporate TR Index, which returned 1.3%. Performance is total return, net of fees and in euro terms.

The Portfolio underperformed the index, driven primarily by being lighter on credit risk than the index through most of the period as well as being overweight duration at longer tenor points. As credit spreads continued to grind tighter and government bond yields rose, especially at longer tenors, these positions contributed negatively to relative returns. Towards the end of the review period, we used the new issue market to increase the credit risk in the Portfolio to a neutral position. The policies adopted by the Portfolio means it has an underweight exposure to certain sectors such as industrials and energy. These sectors, as well as some areas of the market that were worst hit during the Covid-19 pandemic such as airports, performed particularly well into the end of 2020, and our underweight exposure detracted from relative returns.

Market Review

European corporate bonds delivered positive returns over the six months, outperforming government bonds. The period was characterised by rising interest rate and inflation expectations against the backdrop of accommodative monetary policy and huge fiscal stimulus as well as the rollout of vaccines. As a consequence, credit yield spreads narrowed, while long-term interest rates rose. As the period progressed, US economic data generally outpaced the eurozone's, with the European Union (EU) vaccination campaign appearing relatively sluggish in comparison to the United States of America and United Kingdom (UK). The European Central Bank (ECB) raised quantitative easing by €500bn and extended emergency measures to help eurozone banks as it cut eurozone growth forecasts. In March, the ECB also said it would accelerate the pace of bond purchases transacted through its €1.9tn emergency programme. The EU agreed to a €1.8tn EU-wide Covid-19 recovery fund, with the European Commission to raise €750bn in debt markets. In December, the EU and UK averted a no-deal Brexit, agreeing to tariff-free and quota-free trade in goods. New issuance activity was buoyant against robust demand for corporate debt. Along with raising cash and refinancing debt, global issuers also sought to finance resurgent mergers and acquisitions activity.

Outlook

While we retain a constructive view on the outlook for credit markets, we are however more cautious in our approach as valuations are beginning to look stretched and corporate leverage shows little sign of decreasing. Although we do see pockets of wider spreads, continuing global central bank intervention makes it difficult to envisage a significant sell-off in credit assets. Generally, we prefer to be neutral to shorter duration in our positioning. We continue to focus on areas where carry and roll down is most attractive and remain focused on identifying opportunities to participate in new issues with compelling valuations. We believe corporate bonds continue to be an attractive asset class for investors in search of income.

BMO Responsible Global Emerging Markets Equity Fund

Performance

Over the twelve months to 31 March 2021, the Class A Inc USD shares returned 18.9%. By comparison, the MSCI Emerging Markets NR Index, returned 22.2%. Performance is net of fees and in US dollar terms.

The Portfolio underperformed its benchmark over the six months. In terms of the individual exposures, having a zero holding in electronics group Samsung was a significant negative, with the stock boosted by the positive news on coronavirus vaccines and good financial results. Meanwhile, overweights to some of the more defensive holdings such as consumer goods group Unilever and dairy company Vietnam Dairy Products acted as a drag on relative performance amid a rotation in favour of cyclical sectors. The biggest contributor to relative performance over the period was not owning benchmark heavyweight Alibaba which fell 20%. The abrupt cancellation of the IPO of Alibaba's financial services subsidiary (Ant Group) and subsequent announcement of anti-trust investigations by the Chinese government placed considerable pressure on Alibaba's share price. Although Alibaba has been one of the clear Covid-19 winners, we do not own this name because of concern over its shareholding structure. Indonesia's Bank Mandiri and India's HDFC were buoyed by the encouraging news on Covid-19 vaccines and recovery hopes. Other positive contributors included Hong Kong-listed transport and logistics company SITC International.

Market Review

Emerging markets rallied strongly over the six months. Korea and Taiwan led the market, with strong returns from their respective technology sectors, which investors viewed as well placed to benefit from a potential upturn in global growth during 2021 on the back of vaccine rollouts. Malaysia was hit by a surge in domestic Covid-19 cases and worries over the impact of lockdowns on the country's economy. China's economy expanded 6.5% in the fourth quarter year on year, supported by a sharp rise in industrial output in December. As the period progressed, there were increasing expectations that Beijing would tighten monetary policy. Survey data for March pointed to an acceleration in economic activity across China's manufacturing and service sectors. Official data showed Chinese exports had surged 60.6% in the first two months of 2021 versus the same period in 2020. November saw the creation of the Regional Comprehensive Economic Partnership, to be the world's largest trading bloc, with its 15 members including China, Japan, Malaysia, Singapore, Thailand, South Korea and Australia.

Outlook

With emerging market (EM) equities offering highly attractive growth opportunities, the asset class is well positioned to benefit from a post-Covid economic recovery given positive news on vaccines and abundant liquidity. While Joe Biden's presidency should lead to more benign US foreign policy in general, the evolution of US-China relations will be one of the key dynamics for EM markets in 2021. The other big question is whether 2020's high-flying, new economy, Covid-19 winners will lead the market. We believe the dramatic growth for some of the e-commerce stocks is unlikely to be repeated in 2021 and we have already seen signs of some rotation away from such stocks. If the global economic recovery gathers further momentum, we could see a continued rotation in favour of cyclical sectors.

Performance

Over the six months to 31 March 2021, the Class A EUR shares returned 15.5%; by comparison the MSCI World NR Index returned 19.3%. Performance net of fees and in euro terms.

The Portfolio underperformed the benchmark over the period. Stock selection drove the bulk of the underperformance. The largest individual detractor was SAP, on the back of a disappointing announcement that the transition to the cloud would be more protracted and expensive than previously thought. We saw other stocks hit by profit-taking as investors switched into the more cyclical industrials stocks. This included the position in automation specialist Keyence and Murata Manufacturing, despite strong quarterly results; On the positive side, strong results and the rally across the financials segment saw US specialist bank SVB Financial perform strongly. The same two factors resulted in Indian bank HDFC Bank making good gains over the quarter. Lighting and building management solution company Acuity Brands rallied as its new management reinvigorated its LED product range. Our zero exposure to the energy sector was negative, as it rallied strongly.

Market Review

Global equity markets rose strongly over the six months. Stocks found support from the rollout of Covid-19 vaccines along with accommodative monetary policy and fiscal support measures. President Biden signed a \$1.9tn coronavirus relief package into law and unveiled further plans to increase spending on infrastructure by \$2tn. US business survey data for both manufacturing and services pointed to strong levels of activity. Citing uncertainty around the eurozone's near-term outlook given the impact of coronavirus, the European Central Bank said it would speed up the pace of bond purchases transacted through its €1.9tn emergency programme. Global government bond yields rose over the period against economic recovery hopes as well as higher government borrowing and issuance. Inflation expectations increased given the potential for effective Covid-19 vaccination campaigns to drive a strong economic recovery.

Outlook

Global equities appear well supported by massive ongoing fiscal and monetary stimulus along with the rollout of coronavirus vaccines. We have witnessed some rotation out of quality growth, momentum and 'stay-at-home' stocks in favour of economically sensitive areas of the market such as energy, transportation, commodities, financials and the more cyclical areas within industrials. We view the recent sharp rise in US Treasury bond yields as an investor-led reaction to prospects for stronger economic activity, while central banks remain highly accommodative. We do not see central banks withdrawing liquidity, a factor that has caused yields to spike and asset markets to fall in the past. We therefore believe that a leadership change in global equities is possible during 2021, but this will not, by itself, derail the current equity bull market.

Performance

Over the six months to 31 March 2020, the Class A Acc USD shares returned 28.1%; by comparison the MSCI ACWI SMID Cap NR Index returned 29.6%. Performance is net of fees and in US dollar terms.

The Portfolio underperformed the benchmark. The Portfolio lagged the rotation in the stock market towards potential beneficiaries of the anticipated opening up of the economy. A zero weighting to the oil sector was a negative as this switched to being one of the best performing areas. On the positive side, strong results led to US apparel manufacturer, Kontoor Brands, performing strongly whilst US specialist lender, SVB Financial, also had solid results and gained as financials rallied. US industrial technology firm, Zebra Technologies, saw gains as it strengthened its position in hand held devices. The negative side was dominated by stocks affected by the rotation to cheaper, more cyclical, so the likes of Wolters Kluwer, and Hoya and ICON, in medical technology, were detractors despite delivering strong results.

Market review

Global equity markets rose strongly over the six months, with smaller companies outperforming the wider market. Stocks found support from the rollout of Covid-19 vaccines along with accommodative monetary policy and fiscal support measures. President Biden signed a \$1.9tn coronavirus relief package into law and unveiled further plans to increase spending on infrastructure by \$2tn. US business survey data for both manufacturing and services pointed to strong levels of activity. Citing uncertainty around the eurozone's near-term outlook given the impact of coronavirus, the European Central Bank said it would speed up the pace of bond purchases transacted through its €1.9tn emergency programme. Global government bond yields rose over the period against economic recovery hopes as well as higher government borrowing and issuance. Inflation expectations increased given the potential for effective Covid-19 vaccination campaigns to drive a strong economic recovery.

Outlook

Global equities appear well supported by massive ongoing fiscal and monetary stimulus along with the rollout of coronavirus vaccines. We have witnessed some rotation out of quality growth, momentum and 'stay-at-home' stocks in favour of economically-sensitive areas of the market such as energy, transportation, commodities, financials and the more cyclical areas within industrials. We view the recent sharp rise in US Treasury bond yields as an investor-led reaction to prospects for stronger economic activity, while central banks remain highly accommodative. We do not see central banks withdrawing liquidity, a factor that has caused yields to spike and asset markets to fall in the past. We therefore believe that a leadership change in global equities is possible during 2021, but this will not, by itself, derail the current equity bull market.

Jamie Jenkins

Portfolio Manager

May 2021

BMO Investments (Lux) I Fund

BMO Sustainable Multi-Asset Income Fund

Performance

Over the six months to 31 March 2021, the Class I EUR shares returned 7.1%. Performance is net of fees and in euro terms.

Our portfolio positioning retains its bias towards higher quality, sustainable growth companies that can prosper despite near-term economic and policy-driven volatility, giving us a bias towards Healthcare, Information Technology and Industrials. Our integrated approach to Sustainable Investment prevents any allocation to companies that manufacture weapons or tobacco or that own fossil fuel reserves. We continue with our strategy of adding to positions where we see strong underlying quality and where the market allows us to add at more attractive levels. The largest allocation remains to sustainable equities. This is balanced by the allocation to sustainable credit and a smaller position in alternatives. There is only a very small allocation to government bonds and liquidity in the current low interest rate environment.

Market review

Global equity markets rose strongly over the six months. Stocks found support from the rollout of Covid-19 vaccines along with accommodative monetary policy and fiscal support measures. President Biden signed a \$1.9tn coronavirus relief package into law and unveiled further plans to increase spending on infrastructure by \$2tn. US business survey data for both manufacturing and services pointed to strong levels of activity. Citing uncertainty around the eurozone's near-term outlook given the impact of coronavirus, the European Central Bank said it would speed up the pace of bond purchases transacted through its €1.9tn emergency programme. Global government bond yields rose over the period against economic recovery hopes as well as higher government borrowing and issuance. Inflation expectations increased given the potential for effective Covid-19 vaccination campaigns to drive a strong economic recovery.

Outlook

Global equities appear well supported by massive ongoing fiscal and monetary stimulus along with the rollout of coronavirus vaccines. We have witnessed some rotation out of quality growth, momentum and 'stay-at-home' stocks in favour of economically-sensitive areas of the market such as energy, transportation, commodities, financials and the more cyclical areas within industrials. We view the recent sharp rise in US Treasury bond yields as an investor-led reaction to prospects for stronger economic activity, while central banks remain highly accommodative. We do not see central banks withdrawing liquidity, a factor that has caused yields to spike and asset markets to fall in the past. We therefore believe that a leadership change in global equities is possible during 2021, but this will not, by itself, derail the current equity bull market. We anticipate a further move for higher and steeper government bond yields over the remainder of 2021. The rollout of coronavirus vaccines combined with a higher inflationary backdrop and supportive fiscal policy means further normalisation should be priced into government bond yields. While we retain a constructive view on the outlook for credit markets, we are more cautious in our approach as valuations are beginning to look stretched and corporate leverage, especially in the US, shows little sign of decreasing. Although we do see pockets of wider spreads, continuing global central bank intervention makes it difficult to envisage a significant sell-off in credit assets. Generally, we prefer to be neutral to shorter duration in our positioning.

Simon Holmes

BMO Sustainable Opportunities European Equity Fund

Performance

In the six months to 31 March 2021, the A share class returned 16.2%. By comparison the benchmark returned 20.1%. Performance is net of fees and in euro terms. The benchmark for this Portfolio was changed to MSCI Europe NR Index on 14/10/19, previously it was the FTSE All-World Developed Europe NR Index.

The Portfolio delivered strong absolute returns in the half year, but ended the period behind the benchmark, as positive vaccine news meant the market continued to move ahead, but under very different leadership. Given the nature of the rally, it is perhaps not surprising that all of the underperformance came from a negative asset allocation, namely due to the Portfolio's underweight to the banks, automobile and energy sectors. This was partly offset by positive stock selection driven primarily by the Portfolio's cyclical and financial holdings. The largest contribution was from the holding of Melrose Industries, which saw a faster than expected recovery in autos and continues to execute well on its strategy. ASML, the chip maker, outperformed on the back of strong results supported by positive news flow in the sector around tight supply. DNB delivered solid fourth-quarter results and outperformed on the back of the shift in the interest rate outlook. Among the detractors were SAP, on the back of a disappointing announcement that the transition to the cloud would be more protracted and expensive than previously thought. Deutsche Boerse saw profit-taking on disappointing results, while though AstraZeneca's results were in line with expectations, the stock suffered in the market rotation following its strong performance.

Market Review

European equity markets recovered strongly over the six months. The eurozone economy shrank by 0.7% in the fourth quarter following the 12.5% expansion in the third quarter. PMI business survey data showed activity in the eurozone manufacturing sector had expanded significantly in February and March as export orders picked up. However, quarantine measures, elevated case levels and concerns over new Covid-19 variants held back the eurozone economy. The eurozone's vaccination campaign was hindered by production shortfalls and safety concerns. PMI data showed a continued contraction in eurozone services activity throughout the quarter. The European Union (EU) agreed to a €1.8tn EU-wide Covid-19 recovery fund, with the European Commission to raise €750bn in debt markets. In December, the European Central Bank (ECB) expanded its quantitative easing programme by €500bn and extended emergency measures to help eurozone banks. In March, the ECB said it would accelerate the pace of bond purchases under its emergency pandemic support programme. A no-deal Brexit was averted, with the EU and United Kingdom agreeing to tariff-free and quota-free trade in goods.

Outlook

While challenges remain, we expect the EU's vaccine rollout to progress, and for European economies to gradually reopen, thereby providing support for some of the most leveraged and currently challenged businesses. The combination of the vaccine rollout together with continued fiscal stimulus and accommodative monetary policy is supportive for European equities and bodes well for European economic prospects in the second half of 2021. Our focus will remain on identifying high-quality companies with wide economic moats and strong balance sheets that can benefit from a brightening outlook but retain the ability to weather any environment. We are keenly focused on picking companies that will thrive in the long term by aligning themselves with sustainability megatrends. Companies with these characteristics tend to be more resilient through business cycles and should prove to be structural winners over the longer term.

BMO US Smaller Companies Fund

Performance

Over the six months to 31 March 2021, the Portfolio returned 41.1%. By comparison, the benchmark (Russell 2000 Index) returned 38.5%. Returns are net of fees, in sterling terms and on a total return basis.

The Portfolio outperformed the Russell 2000 Index in the 6-month period ending March 31, 2021. Both sector allocation and stock selection were positive for the period. The Portfolio's underweight positions in utilities and real estate added to performance, while an overweight position in health care and an underweight position in materials detracted from performance. Stock selection was strongest in financials and health care and weakest in real estate and energy. Vericel and Atkore added to performance, while Meritage Homes Corp. and iRhythm Technologies detracted from relative returns.

Market Review

US stocks found support from monetary easing, fiscal stimulus and optimism around the US Covid-19 vaccination campaign. The S&P 500 reached record highs, trading at nearly 4,000 points in March. The US economy grew by an annualised 4.3% in the fourth quarter versus the 33.4% bounce-back of the prior quarter. Outgoing President Trump signed a new \$900bn Covid-19 relief package into law after the Senate approved the stimulus following months of wrangling. Newly inaugurated President Biden implemented a further \$1.9tn relief package and subsequently proposed a \$2tn government spending plan for infrastructure, with the latter to be funded by an equivalent rise in corporate taxes. US interest rate and inflation expectations increased as the period progressed. US business survey data for both manufacturing and services pointed to strong levels of activity. Official data indicated substantial improvement in the labour market during February and March.

Outlook

US equities are supported by huge fiscal stimulus, a rapid vaccination rollout and corporate earnings that have so far beaten estimates by a wide margin, while the Federal Reserve remains highly accommodative. There is, however, still the potential for bouts of market volatility against the backdrop of the ongoing coronavirus pandemic. Meanwhile, regulatory and tax risk in the US has been rising relative to other regions. We are cautious about elevated valuations in speculative growth companies, while the prospect of an economy transitioning into expansion alongside rising bond yields has already been the catalyst for an initial correction in certain more expensive companies across the equity universe. We believe that a leadership change in US equities is possible during 2021, but this will not, by itself, derail the current equity bull market.

BMO Investments (Lux) I Fund

Notes to the Financial Statements

as at 31 March 2021

1. BMO Investments (Lux) I Fund, (THE “FUND”)

The Fund is a “Société d’Investissement à Capital Variable” and is qualified as a Luxembourg investment company. Under the laws of the Grand Duchy of Luxembourg, the Fund is registered as an undertakings for collective investment pursuant to Part I of the amended Law of 17 December 2010 relating to undertakings for collective investment (the “Law”).

FundRock Management Company S.A. has been designated by the directors of the Fund as management company by an agreement dated 30 December 2005 as amended and restated by an agreement dated 25 February 2016 (the “Management Company”). The list of the investment funds managed by the Management Company may be obtained, on request, at the registered office of the Management Company.

The Management Company was incorporated as a “société anonyme” under the laws of the Grand Duchy of Luxembourg on 10 November 2004 and its articles have been amended for the last time on 31 December 2015 which was published in the *Mémorial C* on 19 January 2016. The Management Company is approved as a management company and regulated by chapter 15 of the Law.

The Fund’s board of directors (the “Board” or “Directors” and each a “Director”) has adopted the ALFI Code of Conduct, which sets out the principles of good governance, and considers that the Fund has been in compliance with it in all material respects throughout the financial period ended 31 March 2021.

2. SIGNIFICANT ACCOUNTING POLICIES

Presentation of financial statements

The financial statements have been presented in accordance with the reporting requirements of the Luxembourg supervisory authorities and Luxembourg generally accepted accounting principles (“GAAP”).

Combined accounts

The combined financial statements have been presented in Euro, the functional currency of the Fund. Where a Portfolio is denominated in a currency other than Euro, the average exchange rate has been used for the Statement of Operations and Changes in Net Assets. The exchange rate ruling as at the reporting date has been used for the Statement of Net Assets.

Investments

As per the Prospectus and for the purpose of determining the Net Asset Value used for subscriptions and redemptions, the quoted investments and those traded in other regulated markets are valued on the basis of the last available price at 31 March 2021.

Securities which are not quoted on, or dealt, in an official or another regulated market, or securities which are so quoted or dealt in but in which the last sale price is not available, and securities for which the last sale price is not representative of the fair market value, the value of such securities will be determined based on an agreed pricing basis and the reasonably foreseeable sales price determined prudently and in good faith, upon the advice of the Investment Manager, by the Directors. Purchases and sales of investments are recognised on the trade date. Gains or losses on sales of investments are computed on the average cost basis and include transaction costs.

Investment income

Dividends are recognised in income, net of irrecoverable withholding tax, on the date upon which the relevant securities are declared “ex-dividend”. Interest income, net of irrecoverable withholding tax, is accrued on a daily basis and includes the amortisation of premiums and accretion of discounts.

Translation of foreign currencies

Assets and liabilities denominated in currencies other than the Portfolios’ reporting currencies have been translated at the rates of exchange ruling at 31 March 2021. Cost of investments and income and expenditure which are denominated in currencies other than the Portfolios’ reporting currency have been translated at the exchange rates ruling on the day of transaction. The exchange gain or loss arising from the translation of these items is taken into account in the determination of the results of operations. The average USD/EUR exchange rate during the period was 0.834578. The USD/EUR exchange rate as at 31 March 2021 was 0.850847.

Cross portfolio investments

At 31 March 2021 there were no cross investments.

Futures contracts on securities and indices

Initial margin deposits are made upon entering into futures contracts and can be made either in cash or securities. During the period the futures contract is open, changes in the value of the contract are recognised as unrealised gains or losses by “marking-to-market” on a daily basis to reflect the market value of the contract at the end of each day’s trading. Variation margin payments are made or received, depending upon whether unrealised losses or gains are incurred. When the contract is closed, the Fund records a realised gain or loss equal to the difference between the proceeds from (or cost of) the closing transaction and the Fund’s basis in the contract.

BMO Investments (Lux) I Fund

Notes to the Financial Statements (continued)

as at 31 March 2021

Forward foreign exchange contracts

The unrealised gain or loss on open forward foreign exchange contracts is calculated as the difference between the contracted rate and the rate to close out the contract. Realised profit or loss includes net gains or losses on forward foreign exchange contracts which have been settled or offset by other contracts with the same counterparty.

Options Purchased and Options Written

The premium paid for options purchased is recorded as an investment and is subsequently adjusted to the current market value of the option. Premiums paid for the purchase of options which expire unexercised are treated as realised losses on the expiration date. If a purchased put option is exercised, the premium is subtracted from the proceeds of the sale of the underlying security, foreign currency or index, in determining whether the relevant Portfolio has realised a gain or a loss. If a purchased call option is exercised, the premium increases the cost basis of the security, foreign currency or index purchased by the Portfolio.

For a written option, an amount equal to the premium received by the relevant Portfolio is recorded as a liability and is subsequently adjusted to the current market value of the option written. Premiums received from written options which expire unexercised are treated by the relevant Portfolio as realised gains on the expiration date. If a written call option is exercised, the premium is added to the proceeds from the sale of the underlying security in determining whether the relevant Portfolio has realised a gain or a loss. If a written put option is exercised, the premium reduces the cost basis of the security purchased by the relevant Portfolio.

Future style options

In the case of options on futures, no premium margin is required as a daily profit and loss adjustment (variation margin) is made by the procedure known as "marking-to-market". The profit of one party to the contract is the loss of the other party. The resulting gains and losses are either debited or credited to the appropriate account on a daily basis via the mark-to-market process. The final valuation is made at the final settlement price of either the expiration date of the option or the day on which it was exercised.

Total Return Swaps

The Fund may enter into swap contracts in which the Fund and the counterparty agree to exchange payments (periodically throughout the life of the contract) where one or both parties pay the returns generated by a security, index commodities, or instruments on an agreed upon notional amount. The relevant indices include, but are not limited to, currencies, interest rates, prices and total return on interest rates indices, fixed income indices and stock indices.

Cash and cash equivalents

Cash and other liquid assets are valued at their face value, including interest accrued, where applicable. Interest is also accrued on bank overdrafts. All cash at bank are held either directly with a sub-depositary or by State Street Bank International GmbH, Luxembourg Branch, on overnight deposit with a third party institution which has been approved by the Board.

Income and receivable from securities lending

The Fund may lend its portfolio securities to specialised banks and credit institutions and other financial institutions of high standing and highly qualified registered brokers/dealers or through recognised clearing institutions such as Clearstream or Euroclear subject to complying with the provisions set forth in the CSSF Circular 08/356. Loans will be secured continuously by eligible collateral authorised from time to time by the CSSF. During the whole period of lending, collateral must be at least equal to the value of the global valuation of the securities lent. Each counterparty will possess an industry standard credit rating that is acceptable to the Investment Manager with reference to the market conditions prevailing at the relevant time.

Total amount of "Security lending income": 37,117 EUR

Total amount of "Security lending receivable": 8,630 EUR

As at 31 March, 2021, total amount of "Security lending receivable" is included in "Other assets".

3. EQUALISATION

The Fund follows the accounting practice known as "equalisation" by which a portion of the issue and redemption price representing, on a per share basis, accrued distributable investment income (excluding capital gains or losses), is credited or charged to distributable income. The amounts attributable to this income equalisation account are included in the proceeds from subscriptions to the Fund's shares or in the payment for the Fund's shares redeemed, and in the "Net equalisation", items of the Statement of Operations and Changes in Net Assets.

BMO Investments (Lux) I Fund

Notes to the Financial Statements (continued)

as at 31 March 2021

4. INVESTMENT MANAGEMENT FEES

The Fund entered into an agreement with the Management Company and BMO Asset Management Limited ("BAML") to act as investment manager to the following Portfolios for a monthly fee calculated on the average of the net asset value of each of the following Portfolios managed by it during the preceding month at the following rates:

Portfolio	Investment Management Fee rates per annum
BMO Diversified Growth Fund - Class A Shares - Euro	1.500%

* Refer to Appendix I.

BAML is a company incorporated in England and regulated by the Financial Conduct Authority ("FCA").

For the BMO Global Convertible Bond Fund, BAML has delegated the portfolio management functions to BMO Asset Management Netherlands B.V.

For BMO US Smaller Companies Fund, BAML has delegated the portfolio management functions to BMO Asset Management Corp.

The Fund entered into an agreement with the Management Company and BMO Portugal, Gestão de Patrimónios S.A. dated 10 June 2009, which was amended and restated by an amendment and restatement agreement dated 25 February 2016, as supplemented by an addendum dated as of 29 December 2017, under which the latter is appointed as investment manager to BMO Plus II for a monthly fee calculated on the average of the net asset value of the Portfolio during the preceding month at the following rate:

BMO Plus II Fund - Class I Shares - Euro **	1.25%
---------------------------------------------	-------

There are no Investment Management Fees payable on Class X shares or Class L shares (if any).

** A stamp duty of 4% is levied and paid to the Portugal Tax Authority on the investment management fees paid to BMO Portugal, Gestão de Patrimónios, S.A.. Investment Management Fees of 1.30% are accrued for these funds.

5. ADMINISTRATION AND DEPOSITARY FEES

State Street Bank International GmbH, Luxembourg Branch ("the Depositary") is entitled to fees payable by the Fund, accruing daily and payable monthly in arrears, of up to 0.50% of the assets under custody plus a transaction charge with respect to its function as the Depositary of the Fund. The actual level of the fees and transaction charges payable for the custody services vary, depending on the different countries. In addition, for acting as Registrar, Transfer, Domiciliary, Administrative and Paying Agent to the Fund, State Street Bank International GmbH, Luxembourg Branch will be entitled to fees of up to 0.045% of the applicable Net Asset Value plus a transaction charge.

In addition State Street Bank International GmbH, Luxembourg Branch is entitled to pass on to the Fund fees charged by external price vendors where the cost of obtaining vendor prices is not contained within the standard State Street Bank International GmbH, Luxembourg Branch fund accounting fixed percentage fee.

6. DIRECTORS' FEES

Each of the Directors of the Fund is entitled to remuneration for their services at the rate determined by the Fund in general meeting from time to time. Those Directors of the Fund who are employees of BMO Asset Management (Holdings) plc (parent of the Investment Managers), or any of its subsidiaries, waive their fees in carrying out their duties as Directors of the Fund. Directors' fees are paid to the remaining directors and allocated to the Portfolios based on average net assets. For the year to 30 September 2021, the Chairman Patrick Johns is entitled to a fee of EUR 27,000 per annum and Directors Jacques Elvinger and Ailbhe Jennings are entitled to a fee of EUR 22,000 per annum. In addition, each Director may be paid reasonable expenses in connection with meetings of the Board or otherwise properly incurred in connection with the business of the Fund.

7. MANAGEMENT COMPANY FEE

The Fund pays to the Management Company an annual Management Company fee payable out of the assets of the Fund of up to a maximum of 0.0375% of the net asset value (on a sliding scale dependant on the size of the Portfolio), with no minimum fee.

8. FORMATION EXPENSES

The expenses incurred in connection with the setting-up of the Fund were borne by the Fund, and amortised over a period of 5 years from the date on which they were incurred. If further Portfolios are created in the future, these Portfolios will bear, in principle, their own formation expenses over a period of 12 months.

BMO Investments (Lux) I Fund

Notes to the Financial Statements (continued)

as at 31 March 2021

9. TAXATION

The Fund is not subject to taxation in Luxembourg on its income, profits or gains. However, the Fund is liable in Luxembourg to a subscription tax (*taxe d'abonnement*) of 0.05% per annum of its net assets, such tax being payable quarterly and calculated on the basis of the total net assets of the Fund at the end of the relevant quarter. The rate of the annual subscription tax is reduced to 0.01% per annum for the Portfolios which, in accordance with Article 174 of the Law, invest exclusively in money market instruments as defined in the Grand-Ducal Regulation of 14 April 2003 and in respect of classes of shares which are only sold to and held by Institutional Investors. No stamp duty or other tax will be payable in Luxembourg on the issue of Shares in the Fund.

Interest and dividend income received by the Fund may be subject to non-recoverable withholding tax in the source countries. The Fund may further be subject to tax on the realised or unrealised capital appreciation of its assets in the countries of origin.

Distributions made by the Fund are not subject to withholding tax in Luxembourg.

The Fund is not subject to net wealth tax.

Dividend and interest income are recognised in the Combined Statement of Operations and Changes in Net Assets on a net basis.

As from 1 April 2007, investment vehicles listed in article 44, 1, d) of the Luxembourg VAT law (SICAVs, SICAFs and management companies of FCPs) should be registered as taxable persons for VAT purposes. As taxable persons for VAT purposes these investment vehicles must comply with the standard obligations foreseen in the Luxembourg VAT law such as VAT registration, VAT compliance and payment of the VAT due on services subject to reverse charge.

Investors should be aware that a United Kingdom offshore funds regime was introduced applicable to United Kingdom investors into "offshore funds". The Board has obtained reporting fund status approval from HM Revenue & Customs for the classes of shares listed below.

The following share classes were included in the application (as at 30 September 2020):

*Refer to Appendix I

The Directors intend to issue the annual investor report on or around 31 March each year via the [BMO Website](#) (This information is unaudited).

10. RELATED PARTY TRANSACTIONS

For certain share classes, BAML may be entitled to a placing and/or introductory fee of not more than 5% of the subscription value of the Fund shares. Out of this fee, stockbrokers or other approved introducing agents may be paid a proportion.

Patrick Johns (Chairman) is a non-executive adviser to BAML.

Jacques Elvinger, a Director of the Fund, is a partner in the Luxembourg law firm Elvinger Hoss Prussen, société anonyme. Mr Elvinger has been an Avocat à la Cour, Luxembourg since 1984.

João Santos, a Director of the Fund, is the Country Head of BMO Portugal, Gestão de Patrimónios, S.A., a subsidiary of BMO Asset Management (Holdings) plc.

Hugh Moir, a Director of the Fund, is Head of Operations and IT at BMO Asset Management (Holdings) plc.

Ailbhe Jennings, a Director of the Fund, is Non-executive adviser to BMO Global Asset Management, a subsidiary of BMO Asset Management (Holdings) plc.

BMO Investments (Lux) I Fund

Notes to the Financial Statements (continued)

as at 31 March 2021

The Fund has entered into an Agency Agreement for the lending of securities in return for a loan fee. During the period under review, State Street Bank International GmbH, London Branch earned EUR 7,423 as securities lending agent. The Investment Managers earned EUR 4,949 for monitoring and oversight of the securities lending program.

No marketing expenses or distribution fees were charged to the following Portfolios:

BMO Euro Bond Fund
BMO Eurozone Equity Fund
BMO Plus II Fund

Any costs incurred in relation to the distribution of these Portfolios/Share Classes (if any) will be borne by BAML.

During the period from 01 October 2020 to 31 March 2021, the BMO Diversified Growth Fund had invested in the BMO Investments (III) (Ireland) Plc - BMO Multi-Strategy Global Equity Fund, managed by the same investment manager. Investment management fees of EUR 18,917 for this portion of the net assets of this Portfolio is waived.

BAML may pass on to the Fund certain approved expenses incurred in the marketing of the Fund. The maximum chargeable during any accounting period is 0.025% of the net asset value of the Fund as the respective Portfolio(s).

BAML may also charge a fee to the Fund to cover the costs incurred in the distribution of the Fund in the various jurisdictions in which it is registered. The amount to be charged during any accounting period may not exceed 0.05% of the net asset value of the Fund or the respective Portfolio(s).

No marketing expenses or distribution fee will be charged to the Hong Kong Share Classes of any Portfolio. Any costs incurred in relation to the distribution of the Hong Kong Share Classes (if any) will be borne by BAML.

BAML is entitled to an annual service fee of 0.015% of the equity and bond investments of the Portfolios making use of its Responsible Engagement Overlay services as described in the Prospectus. This service is not charged to the Hong Kong Share Classes for any Portfolio.

11. STATEMENT OF CHANGES IN INVESTMENTS

A list, specifying for each Portfolio the total purchases and sales which occurred during the period under review, may be obtained, upon request, at the registered office of the Fund and the Fund's Registrar/Administrative Agent, Depositary, or Paying Agent in the relevant jurisdiction.

12. PERFORMANCE FEE

No performance fees were charged to any of the Portfolios during the period.

13. SOFT COMMISSIONS ARRANGEMENTS AND OTHER SIMILAR ARRANGEMENTS

Since the implementation of MiFID II, in January 2018, all third party investment research consumed by investment teams in EMEA, were paid for directly by BMO Global Asset Management. The use of Commission Sharing Agreements ceased at the end of December 2017 and since then, Client Portfolios have only incurred execution-related commission costs.

14. SECURITIES LENDING

The volume of the securities lending transactions will be kept at an appropriate level. The Fund will be entitled to request the return of the securities lent in a manner that enables it, at all times, to meet its redemption obligations. It will be ensured that securities lending transactions do not jeopardise the management of the Fund's assets in accordance with the investment policy.

The income earned from the securities lending program is reflected net of fees in the Statement of Operations and Changes in Net Assets.

State Street Bank International GmbH, London Branch as the securities lending agent receives a 15% fee for their services. The Investment Manager as the Fund's securities lending co-ordinator receives an administration fee of 10% to cover operational costs. There is no hidden revenue. As a result, the Fund receives 75% of the gross revenue generated from securities lending. It is the Investment Manager's policy to return all revenue to the Fund less direct and indirect operational costs.

The table below shows the market value of securities on loan as well as the market value of collateral held as at 31 March 2021. The collateral held at this date provided coverage of 107.21%.

Portfolio	Market Value of Securities on Loan in EUR	Market Value of Collateral held in EUR	Nature of Collateral held
BMO Diversified Growth Fund	1,442,747	1,526,297	Government Bonds
BMO Euro Bond Fund	11,744,593	12,052,889	Government Bonds
BMO European Growth & Income Fund	1,256,411	1,328,559	Government Bonds

BMO Investments (Lux) I Fund

Notes to the Financial Statements (continued)

as at 31 March 2021

Portfolio	Market Value of Securities on Loan in EUR	Market Value of Collateral held in EUR	Nature of Collateral held
BMO European Smaller Companies Fund	1,128,068	1,190,231	Government Bonds
BMO Eurozone Equity Fund	232,500	245,023	Government Bonds
BMO Responsible Global Emerging Markets Equity Fund	17,785,044	19,618,946	Government Bonds

BMO Sustainable Multi-Asset Income Fund	7,393	7,577	Government Bonds
BMO Sustainable Opportunities European Equity Fund	614,930	695,959	Government Bonds
	34,511,964	37,000,698	

The counterparties for securities were: Bank of Nova Scotia, Barclays Capital Securities Ltd., Citigroup Global Markets Ltd., Credit Suisse Securities (Europe) Ltd., Deutsche Bank AG, HSBC Bank Plc., JP Morgan Securities Plc., Merrill Lynch International and Societe Generale S.A.

15. DIVIDENDS DISTRIBUTION

During the period, the BMO Sustainable Multi-Asset Income Fund, which had an ex-dividend date of 11 December 2020, paid the following dividends to shareholders on 15 December 2020.

Share class Name	Share class Currency	Dividend per Share	Amount of Dividends paid out to Shareholders
BMO Sustainable Multi-Asset Income Fund - Class A Shares - Euro	Euro	12.3700	1,162,344
BMO Sustainable Multi-Asset Income Fund - Class F Shares - Euro	Euro	0.0600	6
BMO Sustainable Multi-Asset Income Fund - Class I Shares - Euro	Euro	13.8000	4,871
BMO Sustainable Multi-Asset Income Fund - Class R Shares - Euro	Euro	0.0300	3

For all distributing classes of shares which have registered for United Kingdom Reporting Fund Status it is intended to distribute 100 percent of reportable income (computed in accordance with the definition of reportable income under the United Kingdom Offshore Funds (Tax) Regulations 2009 (as amended)) which accrues to the Portfolio or distributing class, however it should be noted that this cannot be guaranteed. It may be that the Directors consider in certain cases that the amounts available for distribution are so minimal that a distribution is not commercially viable. Where Share Classes have not been registered for UK Reporting Fund Status, the Directors will determine an alternative basis for determining the level of any dividend.

The Board may decide to make dividend payments to Shareholders once a year or more frequently provided that no payment will be made as a result of which the total net assets of the Fund would become less than the minimum required by Luxembourg law.

During the period ended to 31 March 2021, dividends with an ex-dividend date of 15 January 2021 were paid out to shareholders on 29 January 2021 as follows:

Share class Name	Share class Currency	Dividend per Share	Amount of Dividends paid out to Shareholders

16. SWING PRICING

Under certain circumstances (for example, large volumes of deals), investment and/or disinvestment costs may have an adverse effect on the Shareholders' interests in a Portfolio. In order to prevent this effect, called "dilution", the Board may determine that a "swing pricing" methodology applies so as to allow for the Net Asset Value per Share to be adjusted upwards or downwards by dealing and other costs and fiscal charges which would be payable on the effective acquisition or disposal of assets in the relevant Portfolio if the net capital activity exceeds, as a consequence of the aggregate transactions in that Portfolio on a given Valuation Date (as defined in the Prospectus), a threshold (the "Threshold") set by the Board from time to time.

Description of the swing pricing methodology:

If the net capital activity on a given Valuation Date leads to a net inflow/outflow of assets in excess of the Threshold in the relevant Portfolio, the Net Asset Value used to process all subscriptions, redemptions or conversions in that Portfolio is adjusted upwards/downwards by the swing factor set by the Board from time to time.

The swing factor shall not exceed 2% of the Net Asset Value per Share of the relevant Portfolio. Further, for the purpose of calculating the expenses of a Portfolio which are based on the Net Asset Value of the relevant Portfolio (including any applicable performance fee), the Administrative Agent will continue to use the un-swung Net Asset Value.

The swing pricing mechanism was in place for all sub funds during the financial period, except BMO Responsible Global Emerging Markets Equity Fund.

17. SIGNIFICANT EVENT

Beginning in January 2020, global financial markets have experienced and may continue to experience significant volatility resulting from the spread of a novel coronavirus known as COVID-19. The outbreak of COVID-19 has resulted in travel and border restrictions, quarantines, supply chain disruptions, lower consumer demand and general market uncertainty. The effects of COVID-19 have and may continue to adversely affect the global economy, the economies of certain nations and individual issuers, all of which may negatively impact the Fund's performance.

The Paying Agent Agreement between the Fund and SGSS S.p.A. terminated on 30 September 2020.

18. SUBSEQUENT EVENTS

On 12th April 2021 BMO Global Asset Management (EMEA) announced it had reached an agreement to sell its asset management business in EMEA to Ameriprise Financial Inc, subject to regulatory approval and customary closing conditions. The BMO asset management business in EMEA would, on completion of the transaction, become part of Columbia Threadneedle Investments, the global asset management business of Ameriprise. The transaction is expected to close by 30 October 2021.

BMO Portugal, Gestão de Patrimónios, S.A. ("BMO Portugal"), the investment manager for the BMO Plus II Fund, has informed the Board that it will terminate operations on 30 June 2021. The Board has appointed BAML to replace BMO Portugal as BAML will be the investment manager of the BMO Plus II Fund effective 28 May 2021.

19. SOCIALLY RESPONSIBLE INVESTMENT

BAML is convinced that investors increasingly care about environmental, social and corporate governance (ESG) issues and that these may have a material impact on the companies in which we invest. Therefore the Fund has appointed BAML to engage with companies held by the portfolios in order to improve the ESG performance and safeguard investor value. The Responsible Engagement Overlay service, known as reo®, aims to encourage companies to behave more responsibly with regard to social, environmental and corporate issues, in ways that are consistent with shareholder values. The objective of reo® is to encourage investee companies to enhance their business performance by adopting better corporate governance, social and environmental practices. reo® does not entail taking a view of acceptability of what investee companies do nor does it lead to exercising a significant influence over the management of such companies. reo® is about using BAML ability, as manager of the Fund's equity and bond Portfolios, to encourage investee companies, through a constructive dialogue, to behave more responsibly with regard to corporate

BMO Investments (Lux) I Fund

Notes to the Financial Statements (continued)

as at 31 March 2021

governance, social and environmental practices. In BAML's view, reo® may contribute towards business success and therefore increase the value of the investee companies' shares and consequently the value of the Fund's investments. More information on reo® and the specific companies engaged via the reo® service is available in the semi-annual engagement activity report on the [BMO Global Asset Management website](#).

20. APPROVAL OF THE FINANCIAL STATEMENTS

The Board approved the financial statements on 26 May 2021.

BMO Investments (Lux) I Fund

Remuneration and PEA Eligible Assets (unaudited)

REMUNERATION POLICY

FundRock Management Company S.A.

FundRock Management Company S.A. (the "Management Company") has established and applies a remuneration policy in accordance with the ESMA Guidelines on sound remuneration policies under the UCITS V Directive (ESMA 2016/575) and AIFMD (ESMA 2016/579) and any related legal & regulatory provisions applicable in Luxembourg. The remuneration policy is aligned with the business strategy, objectives, values and interests of the Management Company and the funds that it manages and of the investors in such funds, and which includes, inter alia, measures to avoid conflicts of interest; and it is consistent with and promotes sound and effective risk management and does not encourage risk taking which is inconsistent with the risk profiles, rules or instruments of incorporation of the funds that the Management Company manages.

As an independent management company relying on a full-delegation model (i.e. delegation of the collective portfolio management function), the Management Company ensures that its remuneration policy adequately reflects the predominance of its oversight activity within its core activities. As such, it should be noted that the Management Company's employees who are identified as risk-takers under UCITS V are not remunerated based on the performance of the funds under management.

A paper version of the remuneration policy is made available free of charge to investors at the Management Company's registered office.

The amount of remuneration for the financial year ending 31 December 2020 paid by the Management Company to its staff:

EUR 12,070,862

Fixed remuneration: EUR 11,288,396

Variable remuneration: EUR 782,466

Number of beneficiaries: 133

The aggregated amount of remuneration for the financial year ending 31 December 2020 paid by the Management Company to Identified staff/risk takers is as follows:

Identified staff/risk takers: EUR 1,948,900

Other risk takers: EUR Nil

The total amount of remuneration is based on a combination of the assessment of the performance of the individual, the overall results of FundRock, and when assessing individual performance, financial as well as non-financial criteria are taken into account.

The Policy is subject to annual review by the Compliance Officer and the update is performed by HR department of FundRock and is presented for review to the Remuneration Committee and approval by the board of directors of the Management Company.

BMO Group (below note refers to BMO Group only)

In accordance with the UCITS V Directive, the Investment Managers to the Fund has adopted a remuneration policy which is consistent with the remuneration principles applicable to UCITS management companies and aligned with the BMO Global Asset Management (EMEA) Remuneration Policy. The size of the BMO Group (the "Group") and the size of the funds it manages, the internal organisation and the nature, the scope and the complexity of their activities have been taken into consideration in this disclosure.

Remuneration policy

The purpose of the Group's remuneration policy is to describe the remuneration principles and practices within the Group and for such principles and practices:

- (a) to be consistent with, and promote, sound and effective risk management;
- (b) to be in line with the business strategy, objectives, values and interests of the Group;
- (c) not to encourage excessive risk-taking as compared to the investment policy of the relevant sub-funds of the Group;
- (d) to provide a framework for remuneration to attract, motivate and retain staff (including directors) to which the policy applies in order to achieve the objectives of the Group; and
- (e) to ensure that any relevant conflicts of interest can be managed appropriately at all times.

Decision making and governance

The board of directors (the Group's Board) is responsible for the remuneration policy of the Group and for determining the remuneration of the directors of the Group and other staff who undertake professional activities for the Group. The Group's Board has delegated to the Risk and Remuneration Committee (the "Committee") of BMO Asset Management (Holdings) plc (formerly F&C Asset Management plc) responsibility for maintaining a compliant remuneration policy. The Committee solely comprises non-executive directors of BMO Asset Management (Holdings) plc. The Group's Board has adopted the remuneration policy applicable to all members of the Group ("BMO Global Asset Management (EMEA)") for this financial year as reviewed and approved by the Committee periodically (at least annually). The Committee is responsible for, and oversees, the implementation of the remuneration policy in line with the UCITS Regulations. The Group's Board considers that the members of the Committee have appropriate expertise in risk management and remuneration to perform this review.

BMO Investments (Lux) I Fund

Remuneration and PEA Eligible Assets (unaudited) (continued)

Applicability

The remuneration policy, which incorporates compliance with UCITS V requirements, applies to staff whose professional activities have a material impact on the risk profile of the Group or of the funds it manages ("Identified Staff") and so covers:

- a) senior management;
- b) risk takers;
- c) control functions; and
- d) employees receiving total remuneration that takes them into the same remuneration bracket as senior management and risk takers, whose professional activities have a material impact on the risk profile of the Group.

The Identified Staff list and the selection criteria above are subject to regular review (at least annually) by the Committee as well as formally reviewed in the event of significant organisation changes and changes in remuneration regulations the Group is subject to.

Linking remuneration with performance

The Group's remuneration policy is part of the BMO Global Asset Management (EMEA) framework for promoting sound remuneration management, with the objective of providing total compensation to its employees that is warranted by corporate, business unit/function and individual performance and is comparable to market competitors, whilst being consistent with and promoting sound and effective risk management and the achievement of fair outcomes for all customers. Its purpose is to facilitate achievement of the business objectives and corporate values of the Group, with the primary focus on clients, whilst ensuring that BMO Global Asset Management (EMEA) is able to attract, retain and motivate the key talent required to achieve these business objectives and corporate values without incentivising excessive or inappropriate risk.

When setting remuneration levels, the following components and principles form part of the remuneration management framework:

- Fixed remuneration is determined taking into account factors including the requirements of the particular role and the staff member's experience, expertise, contribution level and the fixed pay for comparable roles. Fixed remuneration is set, with reference to market data, at a level that is sufficient to attract high calibre staff as well as to permit the operation of a fully-flexible remuneration policy (including the possibility of a staff member receiving reduced or no variable remuneration in a particular year). The Committee keeps the balance between fixed and variable remuneration under review.
- Variable remuneration is determined annually by reference to both financial and non-financial company performance considerations. External competitor practices are included in the funding review to ensure compensation opportunities in the markets within which the Group operates are given due consideration and retention risks are effectively managed. Incentive funding is developed in view of current and projected economics and risks, supported by BMO Global Asset Management (EMEA) Audit and Compliance Committee inputs, ensuring risk-adjustments and qualitative and quantitative considerations, such as the cost and quantity of capital and liquidity are actively considered as funding adjustments. The Committee ensures that all incentive awards are not paid through vehicles or methods that facilitate the avoidance of the requirements with regard to remuneration imposed by applicable law and/or regulations.
- Variable remuneration is allocated to respective business functions by reference to:
 - contribution of the respective business function or unit to corporate performance;
 - business function performance relative to pre-determined targets and objectives, including adherence to risk management obligations; and
 - competitive market pay data.

Individual award allocations are referenced to the individual achievement during the performance year relative to pre-agreed objectives and assessment of market comparability. Performance is assessed in relation to pre-agreed objectives, which include financial and non-financial goals (including the achievement of fair customer outcomes), compliance with the BMO Group's policies and procedures, adherence to risk management and compliance requirements and the BMO Code of Conduct. The assessment of performance for Identified Staff reflects multi-year performance in a manner appropriate to the life-cycle of the funds that are managed by the Group.

- Application of Financial Conduct Authority's Handbook (SYSC 19E: UCITS Remuneration Code) pay-out process rules, save for disapplication at individual or Group level, which is determined by an annual proportionality assessment.

Quantitative remuneration disclosure

The total remuneration paid by BMO Fund Management Limited to its staff is zero, as all UCITS staff are employed by other companies in BMO Global Asset Management (EMEA).

BMO Investments (Lux) I Fund Remuneration and PEA Eligible Assets (unaudited) (continued)

The table below provides an overview of aggregate total remuneration paid to UCITS Identified Staff in respect of the proportion of their pay aligned to their UCITS responsibilities. It is not possible to apportion remuneration by individual Identified Staff working a specific UCITS fund, therefore figures are provided in aggregate on a UCITS management company basis.

	Headcount	Fixed Remuneration £m	Variable Remuneration £m	Total Remuneration £m
BMO Fund Management Limited Remuneration of UCITS Identified Staff				
of which:	54	0.406	0.815	1.221
Senior Management	19	0.120	0.254	0.374
Other Code Staff	35	0.286	0.561	0.847

Notes on the quantitative remuneration disclosure

Total remuneration reported is the sum of salary, cash bonus, any deferred annual bonus, value of any long-term incentive awards granted in respect of performance in the reportable financial year, plus the value of any applicable cash allowances.

“Senior Management” are defined in this table as the UCITS Directors, Executive and Non-Executive Directors and Group Management Team members of BMO Global Asset Management. “Other Code Staff” includes all other identified Code staff in business areas, internal control functions and corporate functions.

The Identified Staff disclosure represents total compensation of those staff who are fully or partly involved in the activities of the UCITS funds, apportioned to the estimated time relevant to the UCITS or to the amount attributable to the UCITS allocated on an AUM basis.

PEA ELIGIBLE ASSETS

The following Portfolios are eligible for inclusion in a personal equity plan (“plan d’épargne en actions” or “PEA”) in France:

BMO European Growth & Income Fund (89.22% of invested in eligible assets as at 31 March 2021)
 BMO European Smaller Companies Fund (86.20% of invested in eligible assets as at 31 March 2021)
 BMO Sustainable Opportunities European Equity Fund (89.83% of invested in eligible assets as at 31 March 2021)

In any circumstances these Portfolios invest more than 75% of their assets in PEA eligible assets*. At 31 March 2021, these Portfolios had the above mentioned percentage of their assets invested in PEA eligible assets. It is not the intention of the Board to maintain PEA eligibility for these Funds from 15 July onwards.

* Eligible PEA Assets are: (i) shares or investment certificates in companies and investment certificates in cooperative bodies, (ii) units in limited liability companies or equivalent companies (i.e. units not tradable and not listed) and units in companies governed by the French Law No. 47-1775 of 10 September 1947 relating to cooperative bodies, and (iii) subscription rights or warrants for shares/units mentioned in (i) and (ii) above.

BMO Investments (Lux) I Fund

Portfolio Turnover Ratio (unaudited)

The Portfolio Turnover Ratio have been calculated for the period ended 31 March 2021 based on the following formula:

$$\text{PTR} = \frac{(\text{Total purchases} + \text{Total sales}) - (\text{Total subscriptions} + \text{Total redemptions})}{\text{Average net assets of the Portfolio}} \times 100$$

Portfolio	Portfolio Currency	Total Net Assets, average during the year	Portfolio Turnover Ratio as of 31 March 2021 (annualised) %
BMO Diversified Growth Fund	Euro	129,143,412	51.44%

Global data

The following table details the market value of securities lent as a proportion of the relevant Portfolio's total lendable assets and Net Assets, and the value of Total Return Swaps ("TRS") as a proportion of the Portfolio's Net Assets, as at 31 March 2021. Total lendable assets represents the total market value of the securities portfolio excluding derivatives as at the reporting date. The value of TRS is based on the Unrealised Gain/(Loss) on an absolute basis.

Portfolio	Portfolio currency	Securities lent			TRS	
		Market value of securities lent	% of lendable assets	% of Net Assets	Unrealised profit/loss	% of Net Assets
BMO Diversified Growth Fund	EUR	1,442,747	1.43%	1.09%	536,335	0.40%

The above maturity tenor analysis has been based on the contractual maturity date of the securities lent, and of the relevant TRS transaction.

The following table provides an analysis of the non cash collateral received for the securities lending transactions and OTC by clearing mechanism indicating as well the triparty agent and the bilateral, as at 31 March 2021:

	Security lent non cash collateral received	OTC non cash collateral received
Triparty		
JP Morgan Chase Bank	5,057,569	-
Bank of New York	2,266,010	-
Total	7,323,579	-
bilateral	29,725,591	-

Data on reuse of collateral

As at 31 March 2021, none of the cash collateral received in respect of OTC derivative transactions (including TRS) was re-invested. In respect of securities lending transactions, the Fund does not accept cash collateral in the securities lending program.

Non-cash collateral received by way of title transfer collateral arrangement in relation to securities lending transactions and OTC derivative transactions, cannot be sold, re-invested or pledged.

Data on return and cost

For the securities lending transactions the breakdown of return and cost by portfolio is disclosed in the Notes. Please refer to the note "Securities lending".

All returns from OTC derivative transactions (including TRS) will accrue to the Portfolio and are not subject to any returns sharing agreement with the Portfolio's manager or any other third parties.

For TRS transactions costs are not separately identifiable. For these investments, transaction costs are included in the purchase and sales price and are part of the gross investment performance of each Portfolio. Returns are identified as the realised gains and change in unrealised appreciations on swaps contract during the reporting period.

Additional Information for Investors in the Federal Republic of Germany

The following investment compartments are not authorised for distribution in the federal republic of Germany:

- **BMO Investments (Lux) I Fund - BMO Plus II Fund**
- **BMO Investments (Lux) I Fund – BMO Euro Bond Fund**
- **BMO Investments (Lux) I Fund – BMO Eurozone Equity Fund**

Domestic Paying and Information Agent

CACEIS Bank Deutschland GmbH

CBB20

Lilienthalallee 34-36

80939 München

has undertaken the function of Paying and Information Agent in the Federal Republic of Germany (the “German Paying and Information Agent”).

Investors in the Federal Republic of Germany may submit redemption and conversion applications for shares of the Subfunds which may be marketed in the Federal Republic of Germany to the German Paying and Information Agent for onward transmission to the Administrative Agent of the Company.

All payments to investors in the Federal Republic of Germany (redemption proceeds, any disbursements or other payments) may be remitted via the German Paying Agent. The sales prospectus, the Key Investor Information (KII), the Articles of Incorporation of the Company as well as the annual and semi-annual reports are available free of charge and in hardcopy at the German Paying and Information Agent during normal business hours.

Likewise, the issue, redemption and conversion prices of the shares of the Subfunds as well as any notices to the investors in the Federal Republic of Germany are available free of charge as are the agreements concluded between the Custodian Bank and the Company for reference purposes.

Publications

The Issue and redemption prices will be published on www.vwd.com.

Any notices to the investors in the Federal Republic of Germany are published in the Federal Gazette (www.bundesanzeiger.de).
